Washington, Warren County – Abilities of Northwest Jersey is proud to announce that the agency has been renewed as a Community Partner by United Way of Northern New Jersey for 2018, continuing a decades-long relationship that benefits young adults with disabilities seeking employment opportunities in the Warren/Morris/Sussex/Hunterdon area.

Continued funding for Abilities' United Way Employment Exploration and Placement Services program will assist in educating young adults with disabilities and their families about the resources available to secure employment, providing opportunities to explore career options and supporting individuals in securing community employment. Abilities Employment Pathways Supported Employment division has placed more than 667 people with disabilities into community employment since 1986, and continually seeks community partners to create opportunities for everyone seeking employment supports.
