Seamanship

Have you ever wondered how boats work? Some you can row and others have motors. All boats are different, you can buy racing boats, boats with small motors that are meant for fishing, some have both options! When you use a boat for fishing, most have compartments that you can keep the fish in when you catch them. The boats that do not, you can bring a cooler along and fill it up with water. Some people live by the lake and the ocean, they usually keep their boats close to the water. People that do not live close to the water have to pull their boats with their vehicle. They make special trailers to pull boats on.

Flowers and Love
With feelings of joy
Happiness, you are
Wonderful, special days
Spent with you and my
Favorite. Love and roses
In the sky, dreams will
Come true forever.
